Outside of Box

Viewing link to file that will be placed on the drive...
http://geocities.ws/137hweyer_2/info/7Reasons_actionscript.swf

Inside of Box

The joker will be 2.5" tall
The spring will be 3.5" tall
when not compressed.

A "paper pocket" will slide over the end of the spring and be glued into place. This will allow the spring to be attached to the center inside bottom of the box and also onto the back of the jack with glue.
