OUR TRUEST ANSWERS TO ENQUIRIES ON **SURE-CURE** OF DIABETIC DISORDER

1. Can your medicines use while undergoing treatments of Diabetes?

Ans: Diabetic patients are generally advised to use our Herbal Anti-Diabetic Medicine at any stage of the disease alongwith Allopathic Medicines. Those, patients who are already taking Allopathic Medicines for other disorders can also use side by side our Herbal medicine together with that. It will not have any side effects, rather it will try to minimize the side effects of Allopathic Medicines.

2. How long will a diabetic patient use your medicines for a SURE-CURE?

Ans: We would like to clarify that Diabetic Patients are generally asked to continue our Herbal Medicine religiously till sugar level is attained between 75-90, and thereafter our medicine is also to be tapered month after month and a day will come when there will be no need of taking even our medicine. Duration of treatment may vary from patient to patient, depending upon age, severity and duration of diabetic disorder.

3. Can you show me some proofs of which your medicine cured the disease?

Ans: Good question! We have developed this medicine very recently. Its result is miraculous. We have given treatment to 13 patients only up to now. After completion of the course, 9 patients are now a days keeping sound health and feeling quite energetic and it and even they have already stopped taking our medicines also. But they are strictly advised to check their sugar level every month positively without fail. If on any occasion, their sugar level goes beyond 75-90 they are to report back to us immediately. Even they are proclaiming that on few occasions they have even consumed small quantity of sugar but their sugar level still remains normal. But they are still maintaining a disciplined life and daily going to morning and evening walk and side by side practicing some Pranayams regularly. Remaining 4 patients are still continuing medicine and their symptoms are very much under control.
