SONIC TEAM  
PRESENTS

# NIGHTS™

into dreams...

As you wander through the nightmare world, you recall all of your exciting experiences. You remember floating freely, smiling as you drifted through fantastic and beautiful lands. But you also recall fleeing in terror from the nightmare. NIGHTS is an unfolding stage, a breathtaking adventure through Fantastic but dangerous places. Courage and skill determine the outcome of your incredible dream.

NIGHTS is developed by 'Sonic the Hedgehog' creator Yuji Naka, and SEGA's Japan-based 'Sonic Team'. Yuji Naka's creative team has used new development tools to produce previously impossible game features such as smooth detailed 3D spaces in realtime with free character movement at 'Sonic' speed. With fluid viewing angles, fast-paced action and a surreal world of dreams, NIGHTS delivers a revolutionary new aspect to gameplay on the Saturn.
