

# Sony Ericsson Z600

## Profile

**Name:** Sony Ericsson Z600

**Dimensions:** 90x48x27.9 mm

**Weight:** 110g

**Originated:** Germany

- Others:**
- Bluetooth
  - Clam Shell Design
  - Built in Camera
  - 65,536 TFD Color Screen

The built in camera has a small window to take pictures and a little mirror right next to the lens of the camera so you can take a picture or self portrait. The draw back of this is that pictures can only be taken when the phone is open. Then your ready to send a picture message via MMS to anywhere in the world

The Z600 has a 65,536 color MD-TFD display. We know, there is just too many abbreviations flying around in the mobile world...but relax: MD-TFD means Mobile Digital Thin Film Diode. It is a display developed especially for mobile phones. High-speed response for showing video and animations, high visibility both indoors and outdoors and high resolution are some of the advantages.

The Z600 supports Bluetooth FTP (File Transfer Profile). This will allow you to drag and drop ring tones, melodies, graphics, and themes between your phone and you computer. It is also Apple Keep the contact and calendar information in your Macintosh computer synchronized with your Z600. Interact via Bluetooth and iSync, Apple's free synchronization software.

## ~Optional accessories

Gameboard  
Bluetooth car

The Z600 has the ability to play fully color, fast paced, and action games. The Gameboard accessory is on of them that enables the user to use the 8 way directional D-Pad and 4 keypad buttons. Others includes a Bluetooth car that lets you control the vehcile within a 30 ft radius with the Z600's 4 way keypad
