June 13, 2002

To whom it may concern,

I am writing to provide a reference for Louis Byrne who has been working with us on a freelance basis doing network design and support as well as intranet development . Louis has been involved in troubleshooting computer problems, network maintenance, Network design and implementation and training people in computer networking skills. Louis has set up and designed a linux based MySQL database web server system to allow web based recording and retrieval of safety incidents that occur in our centre which has provided a much more efficient means to get this vital information to our program staff. Louis is helping us with migrating our main network from Windows NT4 to Windows 2000 Server.

I would like to say that I feel that Louis is an excellent worker, he has an advanced understanding of a wide variety of computer software and hardware systems. His work has been consistently at a professional level. It has been a pleasure working with him and I will not hesitate to involve him in future projects.

If you have any questions regarding Fred Victor Centre or Louis's involvement please feel free to call me (416) 364-8228 ext 359.
