

Loading CSS file:

Step 1:

Open your myci folder (for Codeigniter) :

Step 2:

Step 3:

Write code in style.css file (PATH= myci/css/style.css):

```
h1{
color:red;

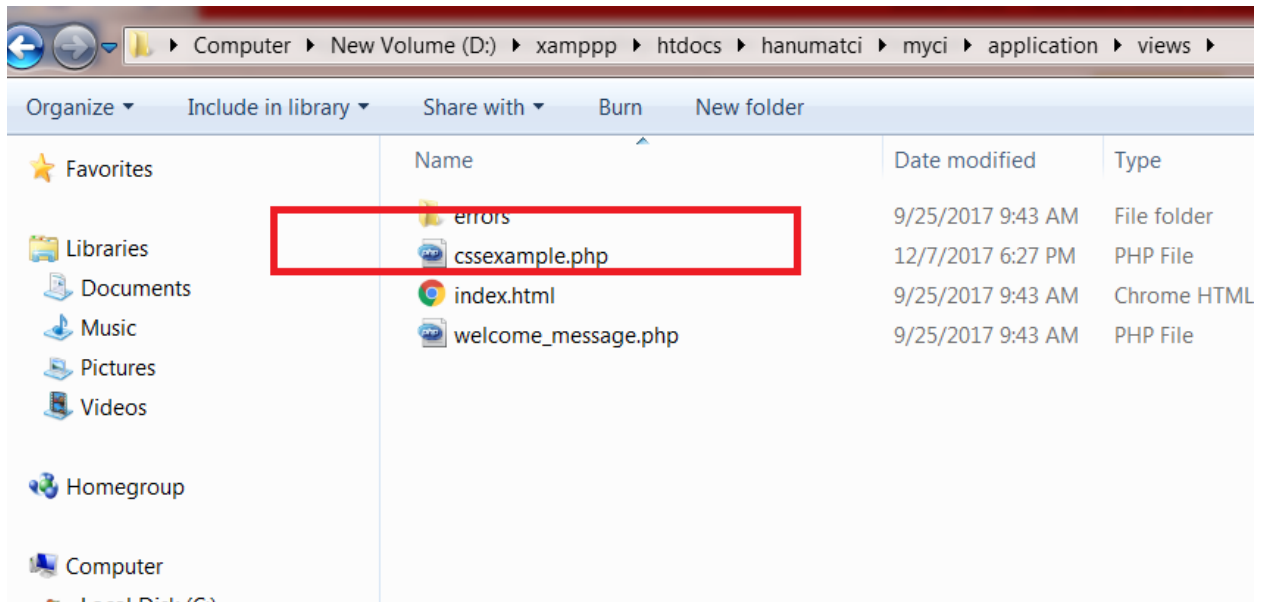

}
body{

background-color:orange;
}
```

```
p {  
    font-family: "Times New Roman", Times, serif;  
}
```

Step 4:

Write code for `cssexample.php` save this file under views (PATH= application/views) :

```
<html>
```

```
<head>
```

```
<link rel="stylesheet" type="text/css" href="<?php echo base_url(); ?>css/style.css">
```

```
</head>
```

```
<body>
```

```
<div class=container>
```

```
<h1> it is main heading </h1>
```

```
<p> hello world </p>
```

```
</div>
```

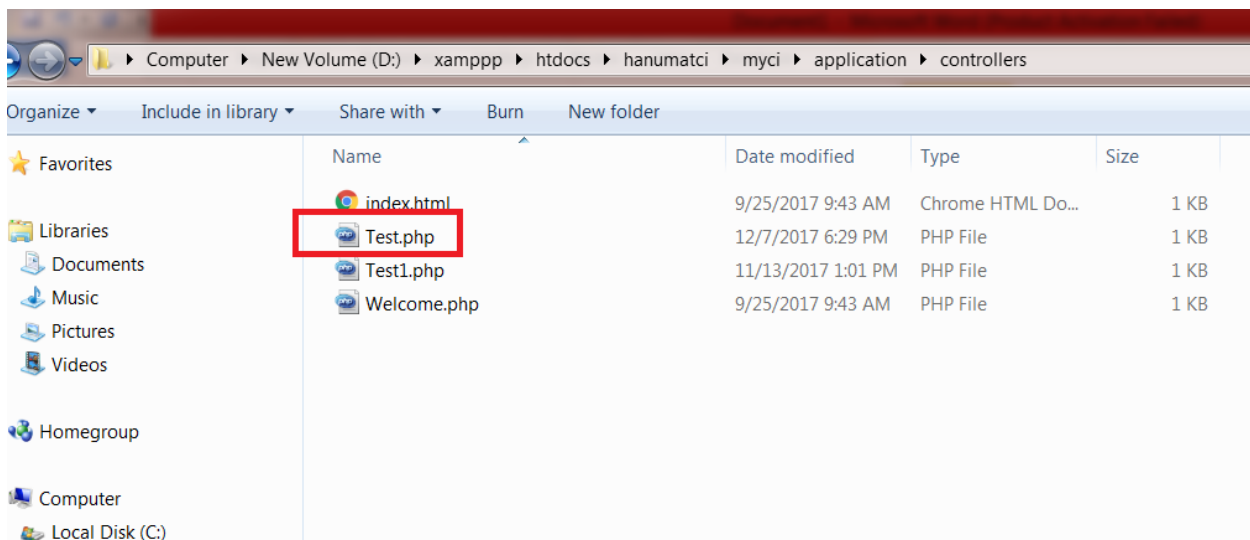

```
</body>
```

```
</html>
```

Note: to load css file from style.css file we have used this line of code:

```
<link rel="stylesheet" type="text/css" href="<?php echo base_url(); ?>css/style.css">
```

**Step 5 : write code for Test.php file and save under controllers folder
(PATH=application/controllers):**

```
<?php
```

```
class Test extends CI_Controller
```

```
{
```

```
function __construct()
```

```
{
```

```
parent::__construct();
```

```
    $this->load->helper('url');
```

```
}
```

```
public function hello()
```

```
{
```

```
    $this->load->view('cssexample');
```

```
}
```

```
}
```

```
?>
```
