# How to change app icon in cordova?

(1)First of all open your project folder & create res folder inside your main (root level) folder

Note: save image by name icon.png inside res folder.

(2)Open config.xml file and add following code line in it.

```
<platform name="android">

    <icon src="res/icon.png" density="ldpi"/>

    <icon src="res/icon.png" density="mdpi"/>

    <icon src="res/icon.png" density="hdpi"/>

    <icon src="res/icon.png" density="xhdpi"/>

</platform>
```

(3)Build your file:-

cordova build

(4)now run and check it.

cordova emulate android.
