

How can you Make Money in Stock Trading ?

Ans:- There are two way Going Short and Going Long

What is a long position?

A long position in traditional trading is when you buy an asset in the expectation its price will rise, so you can sell it later for a profit. This is also referred to as going long or buying.

Going long

What is a short position?

A short position in trading is a strategy used to take advantage of markets that are falling in price. When you make a short trade, you are selling a borrowed asset in the hope that its price will go down, and you can buy it back later for a profit. It is also known as short-selling, shorting or going short.

Going short

Going long	Going Short
