<Scuba leaves alliance by 01-23 12:00:00>

01-23 08:39:27 Alliance [Kai] Scuba informs you:
I kicked those two because they've been inactive for over 3 months now. I really did like samoola though; it's a shame...
[Report] [Circ. Reply] [PM Reply]

01-23 08:41:44 Alliance [Kai] Scuba informs you:
Player samoola has been removed from the alliance.
[Report] [Circ. Reply] [PM Reply]

01-23 08:41:16 Alliance [Kai] Circular Message
Player Aragorn has been removed from the alliance.
[Report] [Circ. Reply] [PM Reply]

01-23 08:40:46 Alliance [Kai] Scuba informs you:
If Z and TR are interested, I'll go and do it right away (switch alliances).
[Report] [Circ. Reply] [PM Reply]

01-23 08:39:27 Alliance [Kai] Scuba informs you:
Man this really sucks ass---only 5 of us have been inactive for less than a week! And we only have 10 members now, but the Alliance page hasn't refreshed yet from 13...

I have more than half a mind to go see if Bangers will let me join. Zlaja and TomRed, what do you guys say? samoola's MIA for 141 days now, The Axe for 20...cedomorac just dropped from the server...Tallun's 18 days...
Seems like we're pretty much rotting away. Anybody who's interested, send me a PM if you could plz.

10-21 09:21:01 Alliance [Kai] Tallun informs you:
Never a dull moment!
[Report] [Circ. Reply] [PM Reply]

10-21 08:57:14 Alliance [Kai] Scuba informs you:
Finally, in the event that I myself fall victim to the circumstances outlined in the alliance rules, Zlaja shall become Grandmaster. Ergo, he is now the Right Hand.
[Report] [Circ. Reply]

10-21 08:54:10 Alliance [Kai] Scuba informs you:
In accordance with Greater Rule #6:

- 1. The Grandmaster, The Axe, has been inactive for over 14 days
- 2. The Right Hand, Trinity, is missing and presumed no longer on the server
- 3. I am the longest resident member after The Axe

I am hereby assuming the title of Grandmaster until further notice.
[Report] [Circ. Reply]

10-21 08:49:05 Alliance [Kai] Scuba informs you:
Awww, man...I totally missed Trinity too. She must have been inactive too long, or we would have gotten a message.

Also inactive:

Aragorn - 77 days
samoola - 47 days
The Axe - 24 days
demonicjesus - 19 days

Seeing as Spud and Trinity are both gone and Axe is inactive, that makes me and Zlaja in charge, apparently. Not that it really matters because we're doing diddly squat these days, but hey. Check the rules on the alliance page.
[Report] [Circ. Reply]

10-21 08:10:47 Alliance [Kai] Tallun informs you:
Ok, I must have had my head up my rear end, what happened to trinity?

08-23 00:26:15 Alliance [Kai] Scuba informs you:
So is there any work being done to achieve any rejuvenation or whatever? I haven't heard anything...
[Report] [Circ. Reply]

08-21 07:57:46 Alliance [Kai] Scuba informs you:
I'd be very interested in hearing any proposed solutions to our alliance slump. Maybe raise the
minimum point value for new members? Because I am really, really sick of the n00bs too.
Unrelated, but I am considering going on a (brief) vacation, maybe Friday-ish, so as to get my act
together to move into the dorm on the 31st.
[Report] [Circ. Reply]

08-20 22:52:33 Alliance [Kai] TomRed informs you:
We do need more members, just high-ranked members.

[Report] [Circ. Reply] [PM Reply]

08-20 21:09:24 Alliance [Kai] TomRed informs you:
Thanks for the rank update whoever did it.
Is graviton the only thing stopping you from getting a Deathstar?
[Report] [Circ. Reply] [PM Reply]

08-20 21:07:49 Alliance [Kai] demonicjesus informs you:
im getting a hell of a lot of probes coming to my worlds

what should i do?
[Report] [Circ. Reply] [PM Reply]

08-20 11:22:51 Alliance [Kai] TomRed informs you:
Annoyingly 1 inactive that I raid "expired". :(
It's a shame because he had a lot of loot. :P
[Report] [Circ. Reply] [PM Reply]

08-20 05:30:17 Alliance [Kai] Scuba informs you:
That's weird...the system one to the right of my main planet suddenly opened up, all except for the #4
slot. Considering that this is the 2nd galaxy, that's surprising...must have been a couple inactives
clogging up the place who just "got expired."
[Report] [Circ. Reply]

08-19 22:10:29 Alliance [Kai] TomRed informs you:
I'm sorry about that Scuba, but it SEEMED that nothing happened. :/
[Report] [Circ. Reply] [PM Reply]

08-19 21:32:23 Alliance [Kai] whosy0urdady informs you:
what does everyone need? i have a total of 230k metal, 120k crystal, and 200k deuterium on a total of 3
planets at 9:31 p.m. server time. so i might have more or less.
[Report] [Circ. Reply] [PM Reply]

08-19 21:01:25 Alliance [Kai] Scuba informs you:
Call me a grump, but I am so f*cking fed up with all these n00b questions---this latest one could have been answered if you JUST TRY IT YOURSELF AND SEE WHAT HAPPENS. Or, failing that, READ THE WIKI.

[Report] [Circ. Reply]

08-19 20:19:05 Alliance [Kai] Scuba informs you:
Oh---that's different than *turning off* your stuff. You just turned it DOWN, not OFF. If you have a negative energy flow, your mines are just automatically throttled back from maximum efficiency. If you look at the top of the res page, it'll say something like "Mine efficiency: .87".
[Report] [Circ. Reply]

08-19 20:00:57 Alliance [Kai] TomRed informs you:
Solar satellites which will put me in the minus.
[Report] [Circ. Reply] [PM Reply]

What did you turn off?
[Report] [Circ. Reply]

08-19 19:55:03 Alliance [Kai] TomRed informs you:
@Scuba
I know that but when turned off I produce the same amount of res that I would usually get...
[Report] [Circ. Reply] [PM Reply]

08-19 19:47:18 Alliance [Kai] Scuba informs you:
You always produce 20 metal and 10 crystal per hour, even if you turn everything off. If you didn't, I suppose it would be possible to "dead-end" yourself at the beginning of the game if you didn't build the right stuff.
[Report] [Circ. Reply]

Okay, several of these guys from the top 150--SAGRES and Swarm--have started probing me. I wonder if this has anything to do with those two guys who always probe me so I probed them back. Too bad I didn't actually get any information out of it, even using 10 probes.

if anyone is wondering, when your banned for a little while i really can't tell you for sure. but if your banned for a couple years or more here is the effects.

-you don't build res

-your planets dissappear

-you can start a new account by same name and password

-anyone can take your planet slots

-and you really can't start playing again because it brings you down to 0 points

it probably is the same for being gone for a month or 2 but i doupt people will have time to take your planet and your points may not go to 0. plus i doupt you can start a new account on top of it.

Ok in Axe's absance i feel that we need to start doing some major damage control, to do that we need to start by talking to all the members of the alliance individualy. I was told to start this a week or so ago

but now it is at the point that this needs to be done quickly and concisely. This stays withing master ranks only. ZlagaPrime if you would start sending messages one at a time to the white sash members through Green, Spud if you would do blue through brown blacks, Scuba please 1st and 2nd blacks, and i'll take 3rd up. Try to get everything you can, player locations, research levels, full building reports on each planet including defences, and what they have in their fleets. Thats what we need for now, try to put in in a spread sheet also so i can combine it. After that we can start seeing who needs help where. I think if we pull this off we can use it to start fortifying our alliance. Also this is a personal thing but maybe we should consider locking down for a while bosting what members we have before gaining new ones. Please give me your feedback. My email is Adria_ori@hotmail.com you can reach me with that same email on MSN messenger.

Hi Mate,

The reason myself left was the fact that the Kai alliance wasn't growing and there was far to many

members, mostly newbies begging and not being bothered to read on how to play the game. This is no reflection on you or anyone in particular just I was on the verge of leaving the game. The Kai alliance hadn't really grown over the last 6 months and not likely to in the next 6 to come. What i do suggest is you kick out the low ranked players and reduce your size so it can be easily managed.

Myself, LexTech and MrEvilJohn have setup a new alliance called Bangers (don't ask it was Lex's name). We will support your alliance just as if we were still in and still do trade etc.

We feel that if we have 4 of us we can trade between us including large loans we can grow very very fast and hopefully within a month or so ALL be Deathstar capable. That would also mean a VERY good alliance with another alliance to you that would scare of many attackers.

Look forward to having a very strong future

Can you pass this on to the other Kai leaders for me

Cheers

Seems to be the day of leaving players.
I am out of here also. Different reasons though. Somethings you may want to correct to keep your

1. Keep out the riffraff. The newbie players who beg for Res, build up and leave. Granted getting the heavy weights in does allow some spies occasionally but that is in the nature of the game.

2. Refer to #1.

3. Good Luck

-you don't build res

-your planets dissappear

-you can start a new account by same name and password

-anyone can take your planet slots

-and you really can't start playing again because it brings you down to 0 points

it probably is the same for being gone for a month or 2 but i doupt people will have time to take your planet and your points may not go to 0. plus i doupt you can start a new account on top of it.

attack the ones with no defenses. that was the strategy that worked best for me. the mine upgrade part i was told from the rest of the alliance. it kept attacks down(oh yeah make robotics factory, shipyard, and research lab on your list too) and pulled in extra res to spend here and there.

Application overview [Kai]

Application of little jim

I want to join the alliance because I need allies. I'm not going to tell you i'm super strong or anything because it's not true. I have 4 light fighters and about 7 heavy fighters and a few defensive buildings. I am new to the game and have been on it for only a few weeks. I am planning to build up my fleet to 100 light fighters and 50 heavy fighters and then invade someone in my galaxy, however if the alliance wishes it I can change my plans. I cannot bring much to the alliance yet however like I said before, someday I will be a boon for you. I hope. I have tried other alliances but they do not work well together, I hope this alliance will be different and look forward to hearing a reply from you.

yours sincerely

Darkstar is all about facilitating the process of enjoying the game by mutual cooperation, enjoyable social interaction and being in a group with playing experience in games like this exceeding the age of the average player by a factor of 26% (yes, we're all old farts)

Arrr!

If **you** feel like an old fart and want to be part of our lounge of ironeating veteran sarcasts, just apply and we'll throw you some meatballs, a pot of pickles and a recently deceased hamster, as a special welcoming gift. We like our people to feel appreciated.

If you feel like joining, we do require a minimum score of 10000 points.

If you're lower in points you can always join our wing: DarkMoon. You'll still be covered by our alliances influence and expected to adhere to the same rules and alliances. Once you reach 10K points your membership of Darkstar can be taken into consideration.

i did a simulation (w/ raksim 2) and an attacker with 11 weapon tech would need 186 IPMs to clear my defenses on that particular planet

since that costs 2325K metal, 465K crystal and 1860K deut i feel pretty safe: it's not a profitable attack unless i've near the double of that res in my planet or a fleet big enough to give a profitable debris for the attackers

but then you're right, you're never TOO safe: other players can demonfreak and ACS!

He got 0-0-0 from the attack (and I had flown all my ships away), and I shot down 43 small cargoes, 278 light fighters (just over half), and a couple other ships.

And then, to top it all off, he didn't send recyclers. So I've already harvested half of the 318k m. and 124k c. DF. His losses: 1.5m; my losses: 2.6m

Nothing personal towards any Newbies but he's right. We do get a lot of Newbies asking for res and then leaving the Alliance.
What I suggest is that Newbies reach a level on their OWN first before getting help. They need to prove patience and loyalty and most of all play the game from the start and reach a certain level like we all have. The best part of this game when starting off is reaching a level on your own and watching your res grow. It's no fun letting others do it for you.
Once at a level then help to grow FAST will be given.

Again nothing personal we do want to help.

Yeah, I'm not really sure whether they'll be back, but it happens sometimes that people will be missing for 2 weeks and then come back. Give 'em a month (30 days), I'd say, and then kick them. There's

actually a rule to this extent on our alliance members' page, but it's not really enforced if the members are of any worth. These guys aren't particularly, though, so I'll just talk myself in circles for a while here... :-)

07-02 06:40:35 Alliance [Kai] Circular Message to Your Alliance [Kai]
Scuba informs you:
The going rate of metal-crystal-deut is usually 3:2:1 or 2:1:1.

So 300k metal, 200k crystal, and 100k crystal would be equivalent on the first scale, or 300k metal, 150k crystal, and 150k deuterium on the second. In my experience, deut is a big bother to mine, though, so I'd hang closer to the first.

06-29 05:30:43 Alliance [Kai] Circular Message to Your Alliance [Kai]

Trinity informs you:

There is a minor situation that i believe needs to be taken care of. Back a few days ago on the 22nd i attempted to attack a member of Tribe alliance named Destroyeroftheworld at location 1:99:11. Aproximately 20 minutes before the attack occured he loged on and told me to recal my fleet and he would send me 10k deut and 5k crystal in the next two days, If i did not recal he would spend all the resources. The catch i would have made from the attack had he not spent the resources would have been 7k metal 52.4k crystal and 64.3k Deut but he had the ships to move everything and so i figured i'd take the small pay off and leave him alone. But before i did recal i asked him how i know he would keep his word and he told me if i didn't to contact Terminator of Tribe alliance and Destroyeroftheworld would be removed from the alliance He never paid up so on the 25th i informed scuba and Axe of what had occured and sent a waring to Destroyeroftheworld giving him till the 29th to pay up and send a message to axe saying he had paid. Once again he never did. I bring this up cause i want to know what you think we should do as the masters in this alliance. This is my last log in for tonight but i will check my messages as soon as I wake up tomarrow morning.

steeldeal informs you:
yeah about that zakia business(glad to have somethin to talk about) it was, for the last time, a false accusation. we were using tabs to make it easier to switch between turns(we take turns on the computer) we didn't read the rules very thouroughly and had no idea what an IP adress was. that was why we got banned. hopefully that finally clears that mess up(although i doupt it). the second thing is i talked to my bro about that and he said he had started up again on ogame so i told him to join my friends alliance(obviously that would be ZeniethH). does that clear all this up. by the way i think The Axe may have a good point. he may be my friend, but i can't say they would be useful before 110 members. the thing i must add to that is think how much quicker than can get to that # if they are friends with Kai. i want everyone to realize that they will become powerful over time, it's just whether we want to be part of it now or wait until they won't need our support nearly as much, in which case we may lose a powerful ally. can anyone disagree with this. this is suicide for anyone who tries, i'm good at winning arguments. anyway, hope you all understand all this now.

As of right now on 25 June 2008 at 8:10 CST, I am bestoying Trinty with the rank of Master, The Cobra Kai's Right Hand. I know many of you think this shouldnt be done because Scuba is a good Right Hand. If anyone was from the orginial formation of this allaince, we did have a Right Hand and it was not Scuba. I need someone that i have served with for quite amount of time and a person that will be there if I will not.

As a side note Trinty will be in constant communication with me via Instant Messnger. Second I will be teaching her personally. I hope all you give the respect as i have. And may this secure prosperity for the Cobra Kai allaince.

I want to believe that the defenses built on a moon as a deterrant to help protect a fleet. the fleet can ACS the mother planet in no time. and also maybe to protect the Phalanx, that is if it could be blown up. Phalanx is a ery usefull tool I found out. Those boys that attacked me the other day saw that I was bringing in a bigger fleet and started to go after it, thought I was going to retaliate. they had it timed to the min.

Who knows , just another part of the game. I would like to see a feature that when you capture someones reserves or DF you could have the ships deliver it to any planet you choose. That would be a excellent feature.

I kinda like their gameplan and it appears to be working well for them. It appears as tho they don't worry about alliances sticking together, lets face it most of them don't. actually not a bad strategy.

Hi Levis, how you getting on?

I'm not afraid of you retaliating against me, shedboy72 feels the same, I just thought if we destroyed your incoming fleets then our asses would have been safe for a little longer, lol

You've obviously been talking with your alliance as they seem to be taking a keen interest in my movements and scoping me out a fair bit, fair play to them and its good to see an alliance sticking together rather than just there to make up the numbers.

Our alliance is the very same, we like to stick together and do ACS attacks/defense etc and we're not afraid to attack both weaker and stronger players. We pretty much will launch at anyone who has a planet that we feel will give us a profit. We tend not to attack planets only for defense crashes as we feel this is not in the spirit of the game, this is why we recalled last night and not because of the threat of retaliation.

Our alliance wouldnt ask for a NAP with yours, its not an act of hostility or anything like that, we just dont do NAPs at all with anyone and we make a point of noting it on our alliance page.

We had one before with another alliance and whilst we were feeding them info, giving them tips and links to helpful sites etc. we got nothing back so I cancelled it.

We are however allies with a couple of other alliances and often go on ACS attacks with them, its a good way to build trust and line your pockets, lol

Anyway, good luck for the future
