

Dear Reader,

I hope you enjoyed reading through my project and I hope you learned there's a lot more to animation than meets the eye. I had lots of fun with my I-Search project, especially getting to learn and create my own website. I'd would say was one of the bigger things I'm proud of. I also had lots of fun with my persona, Nick Waltz. It was like I was able to become another person that I've wanted or actually want to become. A imaginative person who could put his ideas clearly onto a piece of paper, with only a pencil. In the interview with Nick Waltz.

Nick talked about what exactly inspired him to draw and animate. Those were the things that inspired me, too. So what I'm trying to say is that I put some of my own feelings into my persona, Nick Waltz. My persona's emotions aren't entirely made up. Well anyways, hope you enjoyed reading my studies on animation and I hope you come to appreciate animated films more than you did before. Thank You!

Sincerely

Ronny Groszmann.
