

MPC2000XL V1.12 Operating System Upgrade

This is to announce the release of V1.12 operating system for the MPC2000XL. The main purpose of this update is to correct some minor bugs in the operating system.

[Corrections]

1. "Erase All Off Tracks" (Move cursor to track on/off field and press OPEN WINDOW) might not work correctly. Tracks erased using this method become "unused" but may still contain data. - **fixed**
2. Samples with a "space" at the beginning of the name could not be loaded. - **fixed**
3. Hi-hat decay data from MPC60/MPC60-II sequences could not be loaded correctly. - **fixed**
4. A song could not sync properly as a MTC slave device after locating to the end of the song. - **fixed**
5. After converting a sequence to a song, the song may not start playback when slaved to MTC. - **fixed**
6. A song may sometimes take a long time to start playback in MTC master mode. - **fixed**
7. The internal timing of a sequence may contain a slight inaccuracy when playing in loop mode due to a miscalculation of the loop point (less than 1 msec.) Short sequences playing in loop mode may drift out of sync if playing for longer periods. - **fixed**
8. "Error at xxxx:xxxx" may appear and lock up during save functions on some defective disks. - **fixed**
9. When updating the operating system, a "Completed" message may appear even though the system was not properly updated. - **fixed**

Note: *No addendum to the Operator's Manual has been issued since this is only a maintenance version that does not affect the actual operation.*

For information on how to obtain the upgrade, check the Akai web site at <http://www.akaipro.com>, or contact your authorized Akai distributor.
