

This year the Department of Environmental Services will conduct a concrete zone maintenance program in your neighborhood beginning in April.

The County has selected D & F Construction, Inc. to perform the repair and replacement work, and construction throughout your community will begin with a tentative starting date of April 15, 2009 and work is expected to last throughout this year, weather permitting.

The purpose of this letter is to give ample time to the residents within the Civic Association, should they want their driveway aprons replaced during the upcoming concrete maintenance cycle. We appreciate any early notice of the work that you can give to your Association meeting, newsletter, etc.

The construction manager responsible for the program is Mr. Francis Soulamany and can be reached at 703-228-7822 or fsoulamany@arlingtonva.us

All driveway replacement requests should be directed to Mr. Nestor Sol. He can be reached at 703-228-6554 or nsol@arlingtonva.us

If you have any questions, I can be reached at (703) 228-7730 or htran@arlingtonva.us

Sincerely,

Hung Tran
