

INFOWARS

Company produces cardboard cut-outs of
“non-traditional threats”:
Pregnant women, elderly & children

**UPDATE: Company Behind Shooting Targets of
Children
Received \$2 Million From DHS**

**UPDATE: Law Enforcement “Requested” Shooting Targets of Pregnant
Women**

A provider of “realistic” shooting targets to the Department of Homeland Security and other federal agencies has created a line of “non-traditional threat” targets that include pregnant women, mothers in playgrounds and elderly American gun owners.

NO MORE HESITATION - PREGNANT WOMAN THREAT

NMH-1

PRODUCT DESCRIPTION

NMH-1

Non-traditional threat depicting a hostile pregnant woman in a nursery. Background is faded further highlighting and highlighting the threat.

Full Color realistic target.

Size: 23" x 35"

[Law Enforcement Targets, Inc.](#) is a 21-year designer and full service provider of training targets for the DHS, the Justice Department and thousands of law enforcement agencies throughout the country.

The company's website [offers a line of "No More Hesitation" targets](#) "designed to give officers the experience of dealing with deadly force shooting scenarios with subjects that are not the norm during training." The targets are, "meant to help the transition for officers who are faced with these highly unusual targets **for the first time.**"

The targets include "pregnant woman threat," "older man with shotgun," "older man in home with shotgun," "older woman with gun," "young school aged girl," "young mother on playground," and "little boy with real gun."

Why are top training target suppliers for the government supplying the likes of the DHS with “non-traditional threat” targets of children, pregnant women, mothers in playgrounds, and elderly American gun owners **unless there is a demand for such items?**

This is particularly alarming given the fact that the [Department of Homeland Security has purchased roughly 2 billion rounds of ammunition](#) over the course of the last year, enough to wage a near 30 year war.

In comparison, during the height of active battle operations in Iraq, [US soldiers used 5.5 million rounds](#) of ammunition a month.

The DHS also [purchased no less than 7,000 fully automatic assault rifles](#) last September, labeling them “Personal Defense Weapons.”

The fact that targets of armed pregnant women, children, mothers in playgrounds, and American gun owners in general are being represented as “non traditional threats” “for the first time” is deeply concerning given the admitted [preparations for civil unrest undertaken by Homeland Security](#) as well as other federal agencies.

[A leaked US Army Military Police training manual](#) for “Civil Disturbance Operations” also outlines how military assets are to be used domestically to quell riots, confiscate firearms and even kill Americans on U.S. soil during mass civil unrest.

This also dovetails with the [continuing characterization of Americans](#) who are “suspicious of centralized federal authority,” and “reverent of individual liberty” as “extreme right-wing” terrorists by DHS-funded studies.

The [US military trained last year](#) to take on another “unusual target” - zombies - which some fear is just a ruse to get troops used to engaging crowds of people with deadly force. As Alex Jones documented in his film [Police State 2000](#), numerous “urban warfare” training drills stretching back well over a decade have revolved around incarcerating and battling the American people on domestic soil. See the other “non-traditional threats” that are being provided in the form of shooting targets to the DHS and thousands of law enforcement agencies below.

Note: The website containing these targets has crashed since this article was published, but [this graphic](#) shows a screenshot of the page with the URL visible.
