

Photo 1  
Emmons Blaine Hall  
F/10, SS 1/200, ISO Auto  
Lightroom: B&W high contrast - white balance: auto - exposure and contrast adjusted.

B&W images have a way of focusing the viewer's attention. Close-up view of the gothic arch entryway, and lancet windows featuring grotesque english gothic architecture. The focal point in this photo is shown on the right third with the face sculpture and old lantern. Sunlight was aimed northeast to create a sharp contrast of negative space to create positive shapes. The University of Chicago is known for its architectural history.
